01 PROFILE

Experienced and resourceful Frontend Web Developer with a strong foundation in JavaScript, CSS3, HTML5, Python, PHP, and MySQL. Adept at utilizing Vue.js, React JS, and Angular to create dynamic and user-friendly web applications. Skilled in version control using Git, and proficient in collaborative tools like Visual Studio Code and project management tools like Jira, Teamwork, Asana, and Trello.

I self-manage, worked with other developers, and have been a team leader of up to 5 developers. Skilled in effective team leadership, problem-solving, and staying updated on web development UI and UX trends. Eager to contribute to your team and create modern, successful websites. I troubleshoot with a solution-oriented mindset and a problem-solving attitude.

02 EMPLOYMENT HISTORY

02/2024 — 05/2024

Data Scientist at Jarvis Walker PTY Ltd.

Dandenong, Melbourne

- Conduct data collection, preprocessing, and analysis to extract insights and drive decision-making.
- Develop and implement machine learning algorithms and models to solve complex business problems.
- Collaborate with cross-functional teams to understand business requirements and translate them into data-driven solutions.
- Perform exploratory data analysis to identify trends, patterns, and opportunities for optimization.
- Design and create data visualizations, reports, and dashboards to communicate findings to stakeholders.
